

## Exos-221

After proving their success on the market for years, the unique *Exos* two-wheel pin-bone removers are now ready for further improvement. The new *Exos* 221 family is lighter, cheaper and more ergonomic than its predecessor. It's now the fastest and most efficient machine available, perfect for professional use.

FOOD PROCESSING  
EQUIPMENT

### Applications

Used either as the only tool for deboning, or as an after-control machine. Some users prefer not to use an automatic bone remover when the quantities to be processed are too small. Covering all situations, the 221 model is offered on four versions:

**221R** – for right-hand users.

**221RW** – for right-hand users. Built-in cleaning device for rinsing the wheel and bone guide.

**221L** – for left-hand users.

**221LW** – for left-hand users. Built-in cleaning device for rinsing the wheel and bone guide.

### Features

- Adjustable speed for optimal efficiency.
- Weight decreased by 10%.
- Increased water flow for an efficient cleaning.
- Easy cleaning after work, no tools are required.
- Hygienic with a smooth design with no hidden angles.

EXOS/2020EN. V1-Alterations reserved.
